First rating of our packaging materials

What are the 10 rating criteria?

1. Method of extraction or cultivation
2. Process of production
3. Recyclability
4. Compostability (industrial or home composting)
5. Reusability
6. Carbon footprint
7. Increased waste treatment
8. Availability of the recycling sector (in France and in Europe)
9. Quality management
10. Social impact

What is the principle of rating?

Thanks to the five-letter logo (A, B, C, D and E) each product in the COMATEC catalogue is presented on a five-level scale in accordance with the specified criteria:

- The most environmentally friendly product in terms of its environmental impact (classified by letter A+), for example, WoodBox series (due to its origin from French eco-forests and its combustion, which contributes to high energy regeneration)
- The least environmentally friendly product, for example, due to its material, method of cultivation or absence of a recycling sector (classified by letter E), for example, PLA (cultivation method and lack of recycling sector, carbon print) or PS produced in Asia (carbon print and recycling sector is not yet sufficiently developed in Europe).

PLANETSCORE®. is the first ever tool in the world of packaging to scale the sustainability of our products and our commitment to ensure greater transparency of the materials we choose and our further actions for improvements.

PlanetScore[®], our 10 criteria

What is PLANETSCORE[®]?

A first ever **tool** in the packaging to score the sustainability of the materials and the products developed or selected by COMATEC.

A **score** on a 5-letter scale (A, B, C, D and E) based on 10 specific criterias relating to the sustainable environmental approach.

A **benchmark** for catering professionals concerned about their eco-responsible approach when choosing a product.

A **manual** used by our R&D department to identify new materials or manufacturing processes.

An **argument** to defend the development of new recycling channels with local and governmental authorities.

by choosing COMATEC, you are supporting our commitments!

Indicative value, non-contractual data.

Proposed by AlB-Vincotte since 1994, this OK Compost conformity trademark is affixed to 100% biodegradable materials and indicates that the labeled products disintegrate completely and improve the final composition of the compost.

EN 13432 is a defined standard which encompasses the characteristics of reusable packagings by composting and biodegradation

REUSABLE

RECYCLABLE refers to material that will partially or fully enter a reproduction cycle, reducing the use of pure raw material

BIODEGRADABLE means a product that can easily decompose under the influence of living organisms (without the addition of chemicals) and without harmful effects on the environment. The duration of biodegradability will depend on the amount of oxygen, humidity and temperature. We remind you that the name "biodegradable", "compostable" or more broadly "degradable" can in no way be an excuse for leaving products in the nature. Products do not decompose quickly, they pose a risk of environmental pollution, including the risk of ingestion by wild animals.

COMPOSTABLE is, first of all, a biodegradable product that can be turned into compost at an industrial enterprise. Industrial composting must comply with specific standards (temperature 75-80 °, humidity 65-70% and oxygen content 18-20%). Under these conditions, the composting process takes about 12 weeks. EN13432 standard

CUSTOMIZABLE product, according to the customer's specifications

STOCK CLEARANCE

Bagasse

Bagasse is a natural material, derived from sugar cane fibre: the cellulose of the plant is grinded and the juice is recovered to make sugar. One tonne of sugar cane yields about 300 kg of bagasse. Our bagasse is produced in China.

It is a 100% renewable resource, since its consumption does not exceed its biological recovery. Sugar cane grows back between 10 and 16 months, depending on the growing conditions. It needs a lot of water, but its yield is interesting and its life span is 10 years.

It is an ally for users who are concerned about the environment. Its use is very wide. We offer it in the form of cutlery, bowls, verrines, plates and trays.

If there was a disadvantage to sugarcane fibre, it would be its supply time and its remote processing location.

Bamboo

Bamboo is a woody grass of the Phyllostachys Heterocycla variety. It grows mainly in forests, 65% of which are in Asia. Our supplies come from China.

Bamboo grows very quickly and requires little water. Bamboo binds 30% more CO₂ than hardwoods, and therefore releases 30% more oxygen. The material is very strong, light and reusable. We offer it in the form of cutlery, verrines, sticks, straws and trays.

Cardboard . Paper

Cardboard is a vegetable fibre from trees, which is converted into cellulose and then into paper, which is layered to make cardboard. Most of these fibres come from eco-managed forests. We source them from France and Spain.

We favour this material in our eco-designs because the recycling process is highly organised and efficient: 85% of cardboard waste is recycled in Europe and 68% in France. One tonne of recycled paper saves around 2.5 tonnes of wood.

Glass . Borosilicate

Glass is mainly composed of a mixture of sand, soda and limestone. We source it from France, Spain and China.

There are 2 different qualities of glass:

- . Borosilicate glass, made of 80% silica, is characterised by its high resistance to mechanical and thermal shocks (over 300°C).
- . Soda-lime glass, made of 70% silica, is used in most industrial products for food use (bottles, jars, etc). It is more delicate and sensitive to thermal variations.

Glass has a strong advantage: it can be 100% endlessly recycled. Despite its weight and the energy required to melt it (1400°C), glass is so much reused in its original form that it could be classified as a green material. In France, up to 74% of glass products are recycled.

Metal

The metal we use is either iron oxide or aluminium.

Aluminium is practically endlessly recyclable, if it is sorted in the dedicated and organised channels.

Palm leaf

When we talk of palm, we mean the leaf sheath of the betel palm (family Arecaceae). The leaves, which are bound to the bark of the tree, fall off naturally, are cleaned, dried and then thermoformed. No processing or additives are added to produce the plates or other products.

The material is 100% natural, waterproof and heat resistant. Compostable and biodegradable, the palm leaf is an ideal resource to meet our ecological concerns.

If there was a disadvantage to palm leaf sheath, it would be its remote growing location, as it comes from India. But we choose local fair trade cooperatives.

PET . RPET

PET (polyethylene terephthalate) is a fossil material transformed to manufacture packaging by injection or thermoforming. The main advantage of PET or rPET is its endless recyclability.

For recycling, PET packaging is flattened into plastic bales and sent to a regeneration and recycling plant. The bales are then cleaned, crushed and softened. Following a precise technical transformation process, they become flakes of different colours. These flakes are then washed and heated to a very high temperature to be transformed into plastic granules. The granules are then sent for a new production.

To reduce the use of pure material, we are increasingly using recycled PET (**rPET**). We favour this material because it guarantees food safety and financial reliability. We believe that PET is a key part of the circular economy and we strongly recommend its usage.

Thanks to our sourcing and production in France, we are able to guarantee 100% traceability.

PP . PP/talc

PP (polypropylene) is made from a fossil material that is converted into granules. At Comatec, eco-design also involves reducing the use of fossil raw materials.

By adding food-grade **talc to PP**, and thanks to our French know-how, we reduce the use of plastic by 20%, obtaining high quality products that are more rigid. Our PP containers are certified washable, reusable and recyclable.

For recycling, PP plastic packaging is sorted, crushed and roughly cleaned. These flakes are washed and heated to a very high temperature to turn them into plastic granules. These granules are then sent for a new production.

PS

PS (polystyrene) crystal is made from fossil material transformed into granules. The main advantage of PS is that it is transparent, light, but also reusable and recyclable, so it contributes to the circular economy. Our PS products have been tested and certified for reuse and machine washing: we guarantee at least 20 washes for our PS products.

For recycling, polystyrene (PS) plastic packaging is sorted, crushed and roughly cleaned. These flakes are then washed and heated to a very high temperature to form plastic granules in a very precise technical process. They are then sent for a new production.

Our PS products are certified washable, reusable and recyclable.

Stainless steel

18/8 stainless steel is a low carbon steel, with 18% chromium and 8% nickel.

Stainless steel is considered as green material, as it is infinitely recyclable and environmentally neutral.

Easily to clean, unbreakable, aesthetic, durable and reusable, it is a trendy material because we control its production (from Asia) and its recyclability in France (at least 80%).

Straw

Our natural straws are made from real wheat straws. They may have some natural imperfections.

It's a renewable, biodegradable and compostable resource. They are heat resistant and therefore suitable for both cold and hot drinks.

Wood

Poplar (*Populus Salicaceae*) or pine (*Pinaceae*) wood comes from different forests around the world. Poplar plantations are a excellent carbon sink, so let's give them priority.

For the Madera and Wood box ranges, we select our poplar wood exclusively from French forests that are sustainably managed and PEFC certified. It is a neutral wood that does not transmit any taste or odour and is perfectly suited to food contact.

Once used, wood is often recovered as energy (after sorting and crushing), or as chips for mulching the soil or as many other wood-based products.

This material is a part of our environmental approach.

LUNCH BOXES

BALUBAG - COTTON

With **BALUBAG**, Comatec revisits the principle of the bundle to create a contemporary version. An original and reusable concept, easy to carry. Simply knot the fabric according to the inspiration of the moment to reconstitute a nice and clever lunch bag. Once opened, the BALUBAG becomes a table runner or a small picnic tablecloth.

It has a central pocket for inserting all kinds of accessories: cutlery, napkins or menu.

100% cotton, bourdon stitch, machine washable (40°C).

With the BLOOM collection, Comatec launches two models of flower-shaped boxes, Lily and Magnolia, which are transformed into boxes with a pure and poetic design, thanks to an ancestral folding technique. Suitable for food contact and resistant to sauces or condiments, their self-locking closure mechanism and their highly stable structure preserve the contents and guarantee safe transport. Easy assembly thanks to preformed folding. Flat storage.

BALUBAG - COTTON

With **BALUBAG**, Comatec revisits the principle of the bundle to create a contemporary version. An original and reusable concept, easy to carry. Simply knot the fabric according to the inspiration of the moment to reconstitute a nice and clever lunch bag. Once opened, the BALUBAG becomes a table runner or a small picnic tablecloth. It has a central pocket for inserting all kinds of accessories: cutlery, napkins or menu. 100% cotton, bourdon stitch, machine washable (40°C).

BLB90N / BLB90C

BLACK / TURMERIC BALUBAG
90 X 90 CM

Inside pocket 29x29 cm

(For 2 - 3 pers. or for 1 entrance/main dish/dessert)

GENERAL TERMS AND CONDITIONS OF SALE

1 - GENERAL POINTS

1-1 Unless expressly agreed in writing by us, our sales are subject to the following general terms and conditions, which cancel any contrary clause appearing in the purchase orders, general terms and conditions of purchase or correspondence of our customer.

1-2 The information contained in our catalogues, prospectus, etc. is provided for information only and may not in any way be considered an offer on our part. The goods offered for sale in our catalogues and on our website www.comatec.fr are described and presented as accurately as possible. However, if despite our best efforts, errors occur, no compensation shall be paid to the customer on account of this.

1-3 Our sales are exclusively reserved for professionals, acting within their professional capacity, to the exclusion of all sales to consumers.

2 - ORDERS

2-1 We reserve the right to amend these general terms and conditions at any time and without prior notice. The general terms and conditions applicable to the customer shall be those appearing in our catalogues or on our website on the date the customer places the order.

2-2 Samples of goods can be sent to the customer upon request. We reserve the right to invoice these samples according to the quantity and destination.

3 - AVAILABILITY

3-1 The products in our catalogues and on our website are subject to availability.

3-2 In this regard, information on goods availability shall be provided to the customer at the time of ordering. We shall not be held liable for any error relating to availability. If the goods ordered are not available, we shall inform the customer immediately by telephone, email or fax.

4 - DELIVERY / DEADLINES / COMPLIANCE

4-1 The delivery terms depend on the destination country and the nature and volume of the order.

4-2 Goods shall be delivered within mainland France within around 72 hours (3 working days) for orders placed before 1pm. The customer must contact us to arrange express delivery within 24 or 48 hours (at an additional cost) and for delivery to any island, French overseas department or territory or abroad.

Our delivery deadlines are provided for information only. Orders may not be cancelled or the goods declined in case of possible delay and no damages shall be paid.

4-3 We reserve the right to deliver in instalments.

4-4 A delivery note shall be provided to the customer to be signed on collection and/or delivery of the goods.

4-5 On delivery and in the presence of the carrier, the customer must check the packages (poorly wrapped or torn pallets, damaged packages, poorly loaded, etc.). In case of damage, written reservations must be provided to the carrier on the delivery note. The customer must inform the carrier of the reservations recorded on the delivery note and any new reservations by registered letter with acknowledgment of receipt within three (3) days, excluding bank holidays, in order to take action against the carrier under the terms of article 133-3 of the French Commercial Code.

5 - GUARANTEE / COMPLAINT / NON-COMPLIANCE

5-1 The customer must check the compliance of the goods delivered within 72 hours of receipt. In the absence of written complaint (by email) within this deadline, the customer shall be deemed to have acknowledged the compliance of the goods with the order. We shall not guarantee any defect on which the customer fails to act within the 72-hour deadline.

5-2 In case of non-compliance, the customer must send, within the aforementioned 72 hours, a complaint specifying the item(s) concerned, the nature of the defect, the quantity concerned, the batch or box number and photos.

5-3 The customer must retain at his own expense all or part of the non-compliant goods until we collect them or until we authorise their destruction.

5-4 The prior agreement of our commercial services is necessary prior to any return of non-complaint and/or defective goods. The costs for returning the non-complaint and/or defective goods shall be borne by us.

5-5 In case of non-compliant goods, we shall draw up credit note on receipt of the returned goods to our services exclusively on one or more wrapped pallets.

5-6 We shall not be held liable for any indirect damages whatsoever suffered by the customer, including but not limited to, loss of revenue, turnover, shortfall, damage to brand image.

5-7 In all cases, our liability shall be limited to the amount paid by the customer for the non-compliant goods.

5-8 Any action by the customer against us in relation to the compliance of goods shall be lodged within one year of the date of the discovery giving rise to the action.

6 - PAYMENT METHODS

6-1 From 1st January 2019 all invoices will be sent by email, a faster and environmentally friendly way of receiving and managing your invoices. Kindly download the following form : <http://en.comatec.fr/demat> and send it back to facturation@comatec.fr.

6-2 Unless agreed to the contrary by our accounts department, invoices must be paid by debit/credit card or bank transfer prior to delivery. With the agreement of our accounts department, we can accept payment within 30 days, by transfer or debit/credit card.

6-3 No discount shall be offered to the customer for early payment, in the absence of exceptional agreement.

6-4 In no case may the customer on his own initiative offset sums owed to him against sums owed to us for the purchase of goods.

6-5 We may at any time offset sums owed to the customer as discounts or rebates against sums owed to us.

7 - LATE / MISSING PAYMENT

7-1 Any delay in payment authorises us to suspend all current orders and deliveries and amend the terms agreed prior to the issue, without prejudice to any other course of action.

7-2 Any delay in payment, in the absence of exceptional deferment agreed in writing, shall lead to the automatic issuing of a late payment penalty equal to three times the legal interest rate in force, as well as a flat-rate penalty for recovery costs of 40 euros. The late payment interest runs from the payment due date to the collection date.

7-3 Failure to pay a single invoice on its due date shall lead to all our invoices becoming immediately payable.

7-4 Any invoice recovered through the courts may, by way of a penalty within the meaning of article 1229 of the [French] Civil Code, have compensation added to it fixed at the flat-rate of 10% of the outstanding sum, in addition to the legal recovery costs and late-payment interest. All legal and/or court costs resulting from late payment shall be borne by the customer.

8 - FORCE MAJEURE

8-1 We reserve the right to suspend and/or cancel orders without compensation in case of force majeure preventing normal operation.

8-2 Events of full strike, lock-out, fire, flood, damage to equipment, riot, delayed delivery from our suppliers, loss of driving power, either by us or our suppliers or carriers, shall be deemed to be cases of force majeure, even if only partial.

9 - LIABILITY

The goods offered comply with the French legislation in force and with the standards applicable in France. We shall not be held liable for imports of our goods to third party countries. It is the responsibility of the customer to ensure that our goods comply with local import or usage regulations.

10 - TERMINATION CLAUSE

We can demand the termination of the order if the customer breaches any one of his commitments. In this case, we must give the customer formal notice, by registered letter with acknowledgment of receipt, to respect his commitments, giving him fifteen days to do so. On expiry of this deadline, if the customer has not complied with his obligations, we can confirm the termination of the order also by registered letter with acknowledgment of receipt.

11 - INTELLECTUAL PROPERTY

The customer undertakes not to depreciate or damage, in any way whatsoever, the brands, logos and other distinctive marks appearing on our goods. We alone own the intellectual property rights (designs and models, copyrights, etc.) appearing on the goods.

No provision hereof or sale of goods can be deemed as transferring the intellectual property rights for the goods to the customer, unless stipulated to the contrary, and duly agreed by us. The customer is prohibited from placing any intellectual property right on the goods in France or abroad. Prosecution for counterfeiting shall be brought against any reproduction or imitation of the goods without our authorisation in accordance with the provisions of the French Intellectual Property Code.

12 - DATA PROTECTION

As part of our activities, we may be required to collect and process certain personal data on natural persons. In accordance with the law of 6 January 1978 on data protection, the customer has the right to access, amend, rectify and delete his data. To exercise this right, the customer can contact us by email: contact@comatec.fr or by mail: COMATEC, ZI Lannolier, Bd François-Xavier Fafeur, 11000 Carcassonne, France.

13 - CONFIDENTIALITY

The customer undertakes to keep all the information and documents we send him within the context of these general terms and conditions confidential and not to disclose them to third parties without our prior agreement. This confidentiality commitment shall remain valid during commercial relations and at the end of these relations for a period of five (5) years.

14 - DISPUTES

These general terms and conditions shall be subject to French law, the parties having expressly agreed to exclude the provisions of the international Vienna Convention of 1980 on the international sale of goods. For all disputes, and in the absence of amicable agreement, only the courts of our registered office shall be competent to hear the dispute, irrespective of the delivery location, even in case of multiple defendants or the introduction of third parties.

15 - MISCELLANEOUS

15-1 Any amendment to these general terms and conditions shall take place by means of written amendment signed by us and the customer.

15-2 In case of contradiction between these terms and conditions and a translation in a foreign language, only the French version shall prevail.

SERVICES +

■ Design department

A creation, an original idea deserves unusual packaging. Our design department offers to evaluate your project in order to provide you a solution that meets your expectations.

■ Individual packing

our teams produce your individual products: cutlery kits with your personalised napkins or your fully assembled meal trays.

■ Customisation

We can personalize some of our products through pad printing, offset printing or engraving.

Subject to minimum order quantity, we can also offer bespoke items and concepts. We can help you to develop your brand, to create your design !

■ Samples

Our samples in reasonable quantities are free of charge except the displays and some other products. For any further information, please contact our export department.

■ ESAT

To surpass ourselves also means to considerate people, places of production and manufacturing methods. For 12 years, we have been the leading employer of ESAT (service for work assistance for people with disability) in Aude, where, for example, we assemble cutlery kits, fold meal trays, repackage some products or carry out individual packagings.

■ Price lists and deliveries

For the price quotes and deliveries, please contact our export department. Most of our products are available and our European deliveries can vary within 5-10 days. For any urgent request, we can provide express deliveries at specific rates.
